

Automatic system for methane and coal dust explosions localization in coal mines - **ASVP-LV.1M**

Explosion in the mine workings

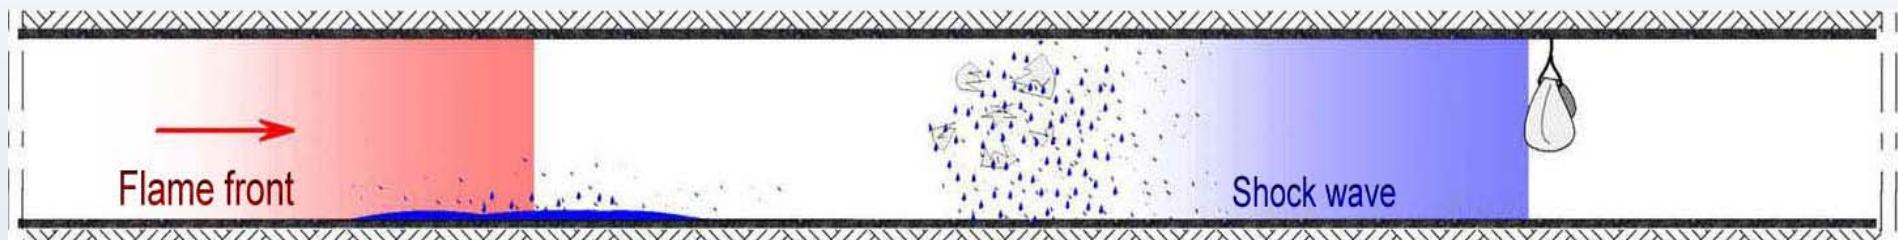

Explosion localization in mines

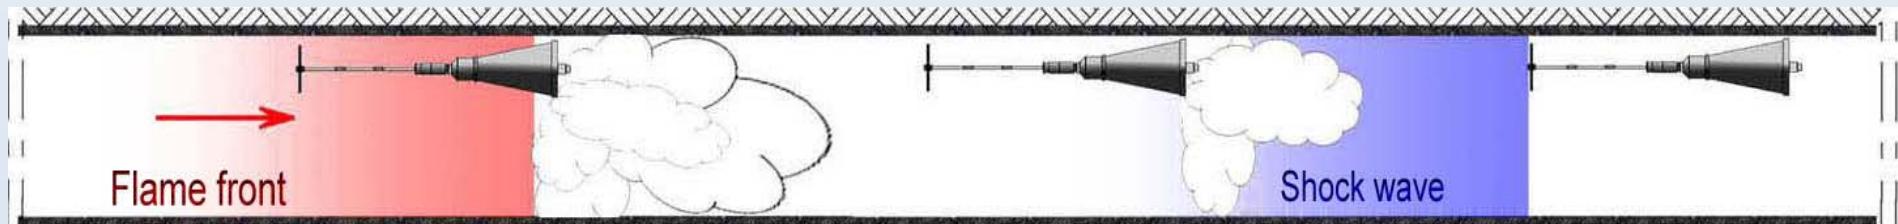

Stone-dust barrier

Water barrier

ASVP-LV.1M

Comparative technical parameters of devices for explosions localization

	Stone-dust barrier	Water barrier	ASVP-LV.1M
Response speed	200-400 ms	150 ms	25 ms
Effectiveness of the extinguishing agent	400 kg/m ²	440 L/m ²	0,01 kg/m ³
Average cloud life time	< 1 s	0,25 s	> 370 s
Spraying distance of fire extinguishing agent cloud	4-7 m	3-5 m	> 30 m

ASVP-LV.1M in action (testing of ASVP-LV.1M in 2011)

Real explosion localization

At the mine Vorkutinskaya (Russia) the barrier of two ASVP-LV in the Conveyor drift 832 has worked efficiently, and the explosion spread to the Ventilation Bremsberg the 32-th did not occur

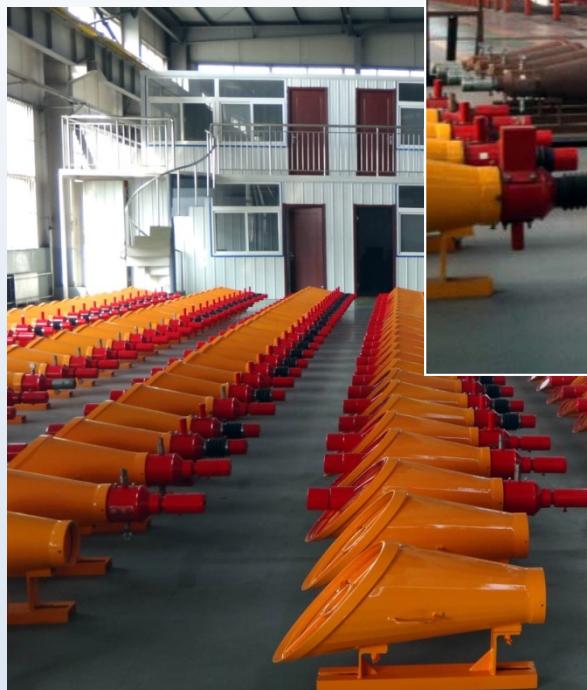

Participation in exhibitions

ASVP-LV.1M were awarded with diplomas and medals at Russian and International exhibitions and congresses

Production of ASVP-LV.1M

Permits for usage of ASVP-LV.1M

Russia and EACU

China

Ukraine
